AMADEUS UNIFARES

Types of Unifares

Amadeus Negotiated Fares is a powerful tool that allows updaters, specifically airlines and consolidators, to create and distribute their Negotiated Fares in a flexible and efficient way online in the Amadeus Farequote database.

Amadeus Dynamic Discounted Fares is another Amadeus Fares database product that allows you to update a discounted fare based on an existing published fare.

ATPCO Private Fares often known as **Category 15** is ATPCO's product for the distribution of airline "flat rate" fares intended for secured office ids. Flat rate fares are fares which do not have a NET level and SELLING level, one amount exists and this is what is printed on the ticket.

ATPCO Negotiated Fares Due to the growing number of "discounted fares" in the market, the ATPCO owner carriers requested ATP to develop a solution for negotiated fares. ATPCO Negotiated Fares Product often known as "**Category 35**" is such a solution which facilitates the airlines need to file their negotiated fares centrally in **one** system.

Airlines have two filing options : 1) File **BOTH** Net and Selling Fare amounts and distribute these fares to specified office ids . 2) File Net Fares only and authorize selected **Travel Agents** to update online the Selling Fare amounts .
